

JAKUB KIERZNOWSKI

Software Developer Intern at IBM | CS & AI student at AGH  

 jakub.kierznowskiii@gmail.com |  +48 662 977 139 |  Cracow, Hybrid, Remote

Building production Java & Python systems. Working on my own SaaS product. Passionate about backend engineering, graph data and AI integration. Actively involved in student governance as part of WRSS WEALiIB. Tech events & hackathons enthusiast → HackYeah TOP 8; Neo4j Agent Hackathon TOP 6.

EDUCATION

AGH University
2023-present

Computer Science and Intelligence Systems

Agile, C#, Data Engineering, Java, PostgreSQL, Python, Neural Networks
Engineering thesis: Applying deep learning for 2D-to-3D mesh conversion

Vth High School in
Cracow
2019-2023

Extended Mathematics, Physics, and Computer Science

C++, learning to solve algorithmic problems

SKILL SET

Tech

Algorithms & Data Structures, AWS (S3), C# (Unity), CI/CD (Jenkins), Docker, Git, GitHub, Java (Spring Boot, Hibernate/JPA, JUnit, Maven), Linux/Bash, MQTT, n8n, OAuth2.0, PostgreSQL, Protocol Buffers, Python (FastAPI, Flask, Matplotlib, NumPy, Pandas, scikit-learn, TensorFlow, pytest), RabbitMQ, RESTful API, Self-hosted LLMs, LLM APIs (Anthropic), Neo4j, Ollama, SQL, Testing (Unit, Integration, E2E)

Soft

Teamwork (Daily Scrums), Agile & Kanban methodologies, team mentor with ZWzT for 2 years (mentored 35+ teams each year through social impact project planning and execution), leadership, coordinating large-scale conference "VOLT 2025"

Languages: English C1, French A2, Polish Native

EXPERIENCE

IBM Software Lab
02.2026-present

Software Developer Intern

Engineered backend solutions in Java Spring, optimizing Data Lineage performance via advanced graph and tree algorithms. Built automated test suites in Python/pytest with advanced fixtures, boosting coverage 5% and cutting pipeline runtime 10%. Managed CI/CD via Jenkins job scheduling, and leveraged AI tools to accelerate onboarding. Worked in a daily Agile/Scrum environment with cross-functional teams at IBM Kraków.

Student Council
2024-present

IT Team Coordinator

Maintaining website using JavaScript, TailwindCSS, Vue and git.
Creating automated workflows using self-hosted n8n with Slack and Google API.

Code Industry
2023-2025

Game Developer

Developed a game called "Student-trainer" with a team under the guidance of a mentor.

MY PROJECTS

InstalDesk

2026 - personal SaaS in development
Python, FastAPI

Desktop invoicing app for Polish contractors with KSeF e-invoicing integration, Stripe payments, offline-first architecture, email activation system and subscription reminders. Built end-to-end solo

IoTServerApp

2026 - Spring Boot
MQTT, PostgreSQL
Docker, Protocol Buffers, AWS S3

Full backend platform for managing IoT smart lamps → JWT auth, real-time MQTT communication via RabbitMQ, OTA firmware delivery, telemetry ingestion and fleet management. Containerized with Docker Compose. Frontend link.

CarCharging

2025 - Spring Boot, REST API, Docker

EV charging optimizer that integrates with the UK Carbon Intensity API to recommend the cleanest 48-hour charging window using a sliding window algorithm.

Fit2Beat

HackYeah 2025 TOP 8
2025 - Python, Flask, Docker

Workout playlist generator matched to BPM preferences. Unusual approach in the competition. Built in a hackathon team, reached TOP 8 of of more than 65 projects.

CERTIFICATIONS

Amazon
Certificates

Application Development
Data Structures and Algorithms
Neo4j Certified Professional
Programming with Java
